

What is Restylane?

Unlike regular collagen fillers, or Botox (which is a toxin), Restylane contains non-animal stabilised hyaluronic acid, an injectable clear crystal gel. The gel boosts the skin's hydration system to lift and smooth fine lines/scars to deeper folds and disfigurements, creating a natural fullness. It is also proven to stimulate Collagen production whilst in the skin, thus less is needed over time. Hyaluronic acid naturally occurs in the skin, so it is not derived from, nor tested on animals, and the risk of any adverse reaction is negligible.

The Cleo 'Q' Multi Gym System - Facial and Body Stimulator

Originally developed by British scientists to treat Bells Palsy (facial paralysis) and other forms of muscle injury.

This is a non-invasive treatment, no injections, toxins or surgery and offers a safe, natural alternative to cosmetic procedures.

The results achieved by medical professionals on damaged muscle were so astonishing, the treatment was made available to people with healthy muscle to combat the signs of ageing.

O-Tropin

O-Tropin contains a careful blend of natural aminos and herbs, in a unique delivery system.

Certain amino acids and vitamins are provided to support healthy and normal pituitary function. O-Tropin is recommended to anyone over the age of thirty who is serious about enjoying the prime of life. What makes Orenda's O-Tropin different from other products is that it includes Orenda's exclusive 3rd Generation Aminosome™ delivery system.

Facial Revitalisation Acupuncture

One of less well known applications of acupuncture in the West is that of facial revitalisation / rejuvenation. However, it has been widely used in China for many years to prevent the onset of wrinkles and facial lines.

As we mature, the quantity of the blood in the skin and underlying facial muscles slowly begin to decrease, causing a loss of nourishment, support and moisture. The face has a high number of acupuncture points and specific areas of the face can be targeted. This will increase the flow of blood and energy through the skin in that area, thereby hydrating, plumping up and boosting the skin supply of nutrients and oxygen and decreasing the appearance of wrinkles and blemishes. The overall result gives you a more youthful appearance.

Here are some of the results you may expect from an Acupuncture face lift:

- ✓ Skin becomes more delicate and fair
- ✓ The elasticity of facial muscles improves (also helps prevent wrinkles from forming!)
- ✓ Reduction of wrinkles
- ✓ Erasing of fine lines and reduction of deeper lines
- ✓ Firming of bags
- ✓ Reduction of sagginess
- ✓ Lifting of droopy eyelids
- ✓ Minimization of double chins
- ✓ Clearing or reduction of age spots

Facial Revitalisation Acupuncture is a safe and painless, non-surgical method of reducing the signs of aging. It revitalises the face providing a safe alternative to botox and surgery. In general, it may erase as many as five to fifteen years from the face, with results after just a few treatments.
