

Tristan's Astrology Forecast

"Expect surprises as Mars moves into Cancer, and a new planetary cycle highlights past and future."

ARIES: Mars, your ruler, moves into Cancer on the 4th March so you can expect a few conflicts and squabbles over the next couple of months! You're pretty good at dealing with conflict. New opportunities arise on the 6th but watch out for the past returning! It is usually best left in the past tense.

TAURUS: Old debts may come to light after March 1st, whether financial or Karmic – this is life's spring clean season, guys! Around the 18th news about work could be a longed-for breakthrough! Sun in Aries after the 20th signals a time of rest, ready for a new solar cycle beginning in April.

GEMINI: It's time to stop spending, you little Gems! This is the month to watch finances, especially after the 4th. You don't need retail therapy this month (tell yourself that enough times). At least your Love life will be fruitful after the 13th. You may attract an ardent admirer!

CANCER: With Mars in your sign on the 4th March you are likely to win this round! Your sights are set on accomplishment and getting your own way this month and you are tipped to be the victors. Expect some clashes about finances but why worry? You're flying!

LEO: You may need to work a little harder on your projects and plans in March. They need firming up. Good news about finance is on its way to you around the 6th. At least it's a good time to make money, so drinks are on you! Towards April, travel features strongly.

VIRGO: Mars moving into Cancer on the 4th will shake up Virgo's life. Its time to party! Let yourself go - not too much of course, you practical Virgos. This is also a time to broaden your horizons and connect with holistic topics, such as astrology. Spend the 8th with a mate!

LIBRA: There may be power struggles for Librans, especially around March 7th. So best be in 'warrior mode'. Don't worry, you are likely to win! Partnerships may be questioned after the 19th for a few weeks, and around the 16th chemistry between you and a work colleague may cause clashes. Tread carefully!

SCORPIO: Oh Scorpio! Love and Passion are about to consume you! Wonderful! That's what you live for after all. With Planets lining up alongside Uranus in Pisces things are likely to get steamy. That Scorpio passion, not just about sex, this month, will drive you forward in many areas!

SAGITTARIUS: Changes are likely to be on your mind now. Expect breakthroughs around 6th March. Life will be more sexy and exciting in April, after all the red tape and paperwork of March. The rest of the year promises more excitement, so hang in there and have fun!

CAPRICORN: Too much of a good thing could be just that this month. You could be amazed how 'sour' things turn after the 1st March with one relationship. C'est la Vie! Mars in Cancer will mean competition in relationships, especially when love-related. You may get surprise visits or news around the 8th March!

AQUARIUS: Stand back and wait for things to heat up at work this month. After the 4th March you'll be excited by the opportunity to make money from something you love involving friends – perfect for sociable Aquarians! Someone from your past may be in touch around the 28th. The plot thickens.

PISCES: Your Star is rising. Uranus is affecting your sign massively this year but don't forget those around you, especially partners. Relationships may liven up! You may get gifts round the 13th but important planetary aspects on 3rd April could influence communications adversely. Don't panic!
